AN ENHANCED FOCUS
ON HIGH PURITY
ENVIRONMENTS AND
MICRO CONTAMINATION

The 2019 UPM agenda successfully introduced High Purity Gases into the High Purity Chemicals strand, establishing Ultrapure Micro as the only event within the industry tackling the breadth of water and water related issues for semiconductor manufacturing.

For 2020 UPM is growing once more, enhancing our focus on high purity environments and micro contamination by introducing a session on airborne molecular contamination (AMC), as well as a specialized tools environment session. It will feature 2 full days of focused technical presentations, interactive panels, roundtables and keynotes.

WHY SPONSOR UPM 2020?

THE PREMIER WATER AND CHEMICALS CONFERENCE FOR THE MICROELECTRONICS INDUSTRY

Ultrapure Micro is the premier water and chemicals conference for the microelectronics industry.

Attended in 2019 by over 350 delegates from across 116 companies, Ultrapure Micro is the only event where you can establish a rapport with technical experts from across the industry. UPM is the only platform of its kind that facilitates the discussions around water and chemical management needed in order to continue advancing the semiconductor manufacturing industry as a whole.

Cement your business as an organization genuinely interested in engaging with the most significant technical minds in water and chemicals management. This is your opportunity to establish and build advocacy among the hundreds of delegates who attend every year.
