THEME: FACILITY 2.0

September 28-30, 2022

Phoenix, Arizona.

In 2022, the scale of construction for manufacturing facilities is unprecedented. The next generation of fabs are not only huge in terms of footprint, but are also extremely complex, with EUV tools and 3D geometries being included for the first time. The management of these facilities will be demanding, presenting a new scale of industry challenges.
